| Burns | Any chemical, thermal or electrical burns causing muscle weakness, muscle or joint tightness, difficulty swallowing, hypertrophic scar, etc. |

Pediatric conditions

Cerebral palsy, Spina bifida, Club foot, Scoliosis, Autism spectrum disorders, Speech, Hearing and Language problems, etc.

Geriatric conditions

Any condition that causes difficulty with walking or activities of daily living or recurrent falls in elderly population.

This is not an exhaustive list. Basically any condition that causes pain, weakness, poor endurance, muscle or joint tightness, walking impairment, difficulty with day-to-day activities (such as dressing, eating, bathing etc.), speaking, or thinking difficulty will benefit from our services.

WHO WE ARE

Our team includes highly skilled Psychiatrist (physician), Physiotherapist, Occupational therapist, speech-language therapist, neuropsychologist, social worker, nutritionist and a nurse. We understand that each patient's need is different and not everyone will require all of these services hence we provide individually designed treatment plan for patients of all ages and conditions mentioned above.

WHY CHOOSE US

We are physician led, comprehensive and we take an interdisciplinary approach (i.e. care being provided by various disciplines in a coordinated fashion) based on individual needs. We are the first in the nation to introduce a program that integrates individuals with physical and/or cognitive limitations due to above conditions back into the community and be independent. We provide quality services at a very reasonable cost.
